

Lash Extensions - After Care Instructions

- Do not expose Nova Lash Eyelash Extensions to water 24 hours after the application.
- When washing the face, use care and avoid splashing water or cleanser in the eye area.
- Do not swim, use hot tubs, jacuzzis or steam rooms for 48 hours.
- Avoid direct contact between moisturizers, eye creams or oil based make up removers.
- Avoid any cosmetic product containing glycols, organic solvent or urea.
- Use only Nova Lash approved water-soluble mascara on your eyelash extensions when needed in between scheduled appointments.
- Do not use water-proof mascara.
- Curling is not recommended because the extensions are pre-curved.
- Avoid rubbing your eyes or pulling on the extensions. Élan Beauty provides clients with a take home lash brush on first visit.
- Eyelashes normally shed on a regular basis, thus multiple extensions may be lost on any given day.
- Keeping the eye area free of make-up accumulation on the lash line can help your lashes last longer.
- Depending on how you take care of your lashes, you may visit our technician for touch ups every 3-4 weeks.
